Recommendation Letter

Dear Sir,   July 10, 2013.

The *Journal of Community Medicine & Health Education* is a peer-reviewed journal, aiming to publish most complete and reliable source of information on the discoveries and current developments on the early diagnosis of disease, the recognition of environmental and occupational hazards to good health and the prevention of disease in the community.

As a reader of this journal, I am well aware about the regular release of issues and the quality of manuscripts that the *Journal of Community Medicine & Health Education* has published so far. As a reviewer, I had the opportunity to participate in the well-conducted, fast submission process observed similarly in other high impact factor journals.

Therefore, I strongly recommend the *Journal of Community Medicine & Health Education* to be indexed in PubMed Central. The Journal staff and editorial board members have worked very hard for the journal to establish its high professional standing.

Sincerely,

Arthur de Sá Ferreira, Ph.D.
