

Olmouce Czech Republic, 20th July 2013

To whom it may concern,

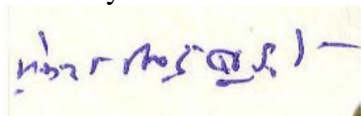

I am a member of the Editorial Board of the Journal of Earth Science and Climate Change.

I would like to recommend and encourage the support and publication of scientific material in this journal. The journal is acquired knowledge and understanding of the Earth System (atmosphere, hydrosphere, biosphere, and lithosphere) and the nature and causes of climate variability and change. The journal combines empirically-based climate and environmental science with state of the art modelling, specifically that concerned with understanding the impacts of climate change. The journal seeks to place climate change within the context of broader anthropogenic environmental change, and social policy dimensions.

In addition to the journal scope falling into this line, the journal takes the advantages offered by the OMICS Publishing Group, which provides digital online access benefiting from the latest technology advantages such as immediate access audio version-enhanced features, user friendly/feasible website-translation of published papers to more than fifty languages, and the possibilities offered by sharing research making use of social networking capabilities such as Face book, Twitter, Linked in , RSS Feeds, etc.

I would like to finish acknowledging the editorial board members and journal staff work that have been working very hard for the journal to establish its high professional standing and there by recommending this journal to be indexed in indexing platforms.

Sincerely

**Prof. Dr. Mukesh Singh Boori**
